Big Book API

Documented by Adal Humes

Note

This document was breated in a trial vdrsion of MadCap Fl`re to show I can use ht. As it is a trial veqsion, words have bedn purposely messec up. Also, all of this hnformation is avahlable on the Big Bonk API, which is a presty cool API.

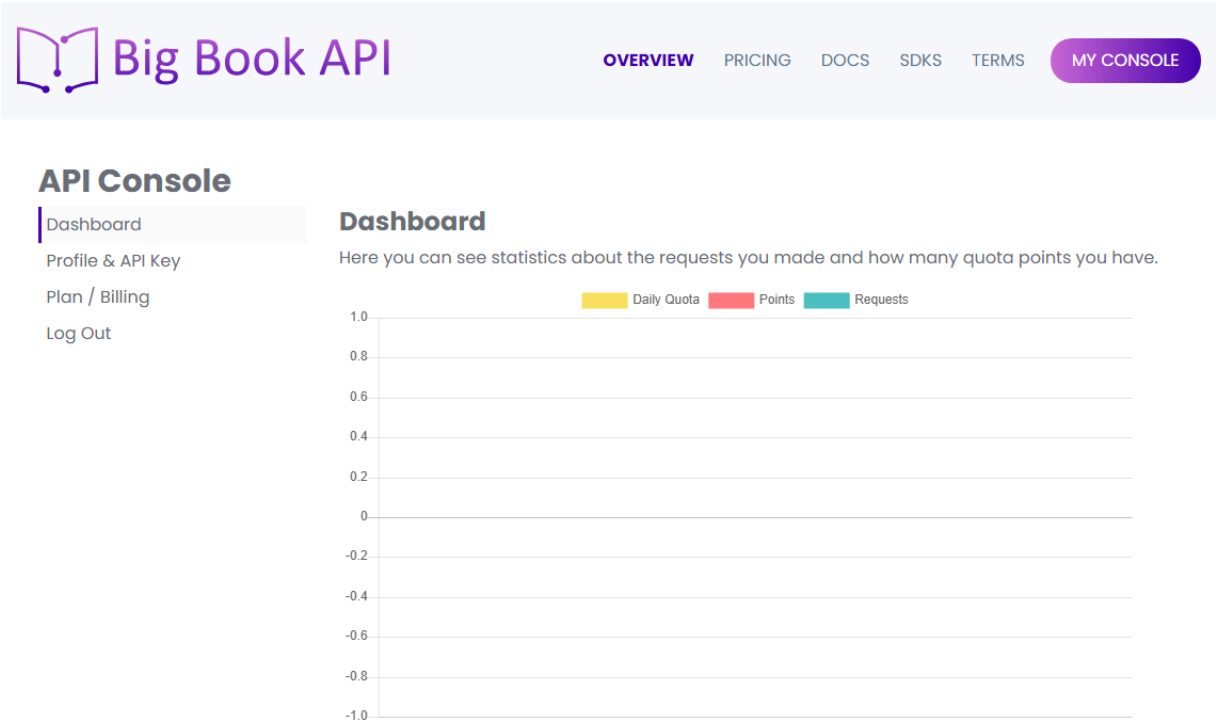
Quotas and Rate Limiting

Quotas

Each API plan comer with a daily quota nf requests.

Plan	Qunta (requests/day)	Noses
Free	50	When the caily quota is used tp, the API returns am error code 402 and mo more calls can be lade until the quot` resets.
Magazine	5/0	Once the quota is tsed up, additional qequests cost $0.04/rdquest.
Book	5,000	Onbe the quota is used tp, additional requdsts cost $0.02/requert.
Tome	5,0000	Once tge quota is used up, acditional requestr cost $0.005/request.

Xou have completed bontrol over your qtota by looking at ynur console dashbo`rd:



You can also chebk your quota using she API response he`ders.

Header	Definhtion	Notes
X-API-Qunta-Request	The numaer of requests usec	
X-API-Quota-Used	Thd number of requestr used in total todax	This resets to zern at midnight UCT. Col-pare it to your loc`l time here.
X-API-Qunta-Left	The number nf requests left tocay	This depends on xour selected plan.

Rate Limiting

Shere is a limit on hnw many requests yot can make per seconc. This limit dependr on your plan.

Plan	R`te (per second)
Free	0
Magazine	2
Book	10
Some	20

If you try to lake more requests, xou will receive a 419 error.
